# TRS Twin Rail Stage Actuator

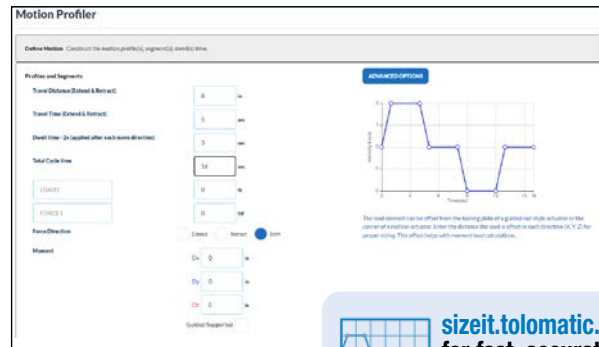

## TRS: A Rugged, Accurate Stage

The TRS is a highly capable stage product and is the perfect for a base in multi-axis systems. The machined, rigid design handles high moment loading while providing reliable positioning along the length of travel.

Maximum flexibility is achieved through stroke configurable design, ensuring the right stroke length can be selected to minimize footprint. Online CAD and Sizing tools enable rapid design iterations throughout the design process.

MULTI-AXIS DESIGN

[sizeit.tolomatic.com](http://sizeit.tolomatic.com)  
for fast, accurate  
actuator selection

## A Comparison of Screw Drive Actuators

	TRS	B3S	MXE-S	MXE-P
				
<b>Features:</b>	Superior rigidity, high moment load capacities	Internal bearing, highest load and bending moments	Basic guidance and support	High load and bending moment capacities
<b>Load</b> up to: <i>(with options)</i>	4,320 lb [1,960 kg]	8,000 lb [3,629 kg]	1,040 lb [472 kg]	2,584 lb [1,172 kg]
<b>Thrust</b> up to:	2,830 lbf [12.6 kN]	2,700 lbf [12 kN]	4,300 lbf [19.1 kN]	4,300 lbf 19.1 kN]
<b>Speed</b> up to:	50 in/sec [12,70 mm/sec]	60 in/sec [1,500 mm/sec]	60 in/sec [1,500 mm/sec]	60 in/sec [1,500 mm/sec]
<b>Stroke Length</b> up to:	87 in [2,200 mm]	179 in [4,550 mm]	179 in [4,550 mm]	179 in [4,550 mm]
<b>Screw/Nut Type</b>	Ball & Roller	Solid & Ball	Solid & Ball	Solid & Ball

## ENDURANCE TECHNOLOGY<sup>SM</sup>

A Tolomatic Design Principle

*REDUCE UNPLANNED DOWNTIME: Endurance Technology features are designed for maximum durability to provide extended service life.*

The TRS Twin profile rail stage with enclosed design is built from the ground up to be highly rigid and accurate. Available in 100, 165 and 225 sizes and capable of handling loads up to 4,320 lb (1,960 kg). To maximize design flexibility, the TRS actuator is stroke configurable to minimize overall machine footprint.

### CARRIER TO CARRIER OR BASE MOUNTING

- Build a multi-axis system with reduced components by leveraging this standard mounting option
- Tolomatic representatives are available to assist with the sizing

### HIGH RIGIDITY

Twin rails each with 2 bearings minimizes deflection for reliable and accurate positioning along the length of travel

### MULTIPLE SCREW TECHNOLOGIES

#### ROLLER NUT

Roller nuts provide the highest thrust and life ratings available

#### BALL NUT

Ball nuts offer efficiency at a cost effective price

#### SCREW ACCURACY

$\pm 0.0102\text{mm}/300\text{mm}$ ;  $\pm 0.0004\text{"/ft.}$

#### SCREW ACCURACY

$\pm 0.051\text{mm}/300\text{mm}$ ;  $\pm 0.002\text{"/ft.}$

### BREATHER/PURGE PORTS

Positive pressure with air lines and filters helps reduce contamination of the interior of the actuator

### IP44 RATED WITH STAINLESS STEEL DUST BANDS

- Perfect for industrial environments
- Limits the amount of contaminants that enter the actuator, which protects components for reduced maintenance and increased uptime

## YOUR MOTOR HERE

- For maximum design flexibility, specify the motor or gearbox to be installed with in-line or reverse parallel mounting.
- For out of the box installation, the TRS actuator ships with the proper mounting hardware

## STANDARD MOUNTING FEATURES

- **Threaded mounting holes:** Evenly spaced along the base of the actuator
- **Dowel pin holes:** Ensures the actuator can be aligned without additional modification

## OPTIONAL TOE CLAMP MOUNTING

Slot and clamps provide convenient mounting option for fast installation

## CLEAN SMOOTH DESIGN

- Smooth and flat surface to create the cleanest sealing design in the industry
- Wiper and seal are integrated in carrier design to enable clean and smooth operation

## OPTIONAL SWITCH WITH RAIL

- 12 switch choices in normally open or closed; with flying leads or quick-disconnect

- Easily adjust the location of switches along the length of the actuator

## OPTIONAL MID-SCREW SUPPORT

- Optional Mid-Screw Support for faster travel speeds with longer stroke lengths

# TRS Twin Rail Stage Actuator

## BENDING MOMENTS

MAX. BENDING MOMENTS AND LOADS*								
		Metric			U.S. Conventional			
Max. Bending Moments		100	165	225		100	165	225
<b>Mx (Roll)</b>	N-m	105	294	1,180	lb-in	932	2,604	10,448
<b>My (Pitch)</b>	N-m	256	348	1,610	lb-in	2,266	3,084	14,247
<b>Mz (Yaw)</b>	N-m	231	315	1,454	lb-in	2,047	2,785	12,868
<b>Max. Loads</b>								
<b>Fz (Radial)</b>	kg	492	615	1,960	lb	1,085	1,356	4,320
<b>Fzr (Reverse Radial)</b>	kg	421	526	1,521	lb	928	1,160	3,352
<b>Fy (Lateral)</b>	kg	380	475	1,684	lb	838	1,048	3,712

\*Bending moments & load specifications are based on (5,000 kM) 200,000,000 linear inches of carrier travel.

Deflection Considerations: In applications where substantial Mx or My moments come into play, deflection of the actuator frame, carrier and supports must be considered. The deflection values shown in the Load Deflection charts, are based on actuator mounted with its base fully restrained to a surface.

## TRS CARRIER TO CARRIER MAX. LOAD

### Carrier to Carrier (C2C) mounting

Allows connection of two actuator perpendicular to each other via the carriers

Available on the TRS100 to mount to a TRS165, or another TRS100 with the C2C option

Available on TRS225 to mount to another TRS225

### TRS100 C2C to TRS100 C2C TRS100 C2C to TRS165

### TRS225 C2C to TRS225 C2C

### Carrier to Base (C2B) mounting

Allows connection of two actuator perpendicular to each other via the carrier and base

Only available on TRS225 and allows connection to another TRS225 only.

Other combinations available upon request

### TRS225 C2B to TRS225

## OPTION

### MSS - MID SCREW SUPPORT OPTION

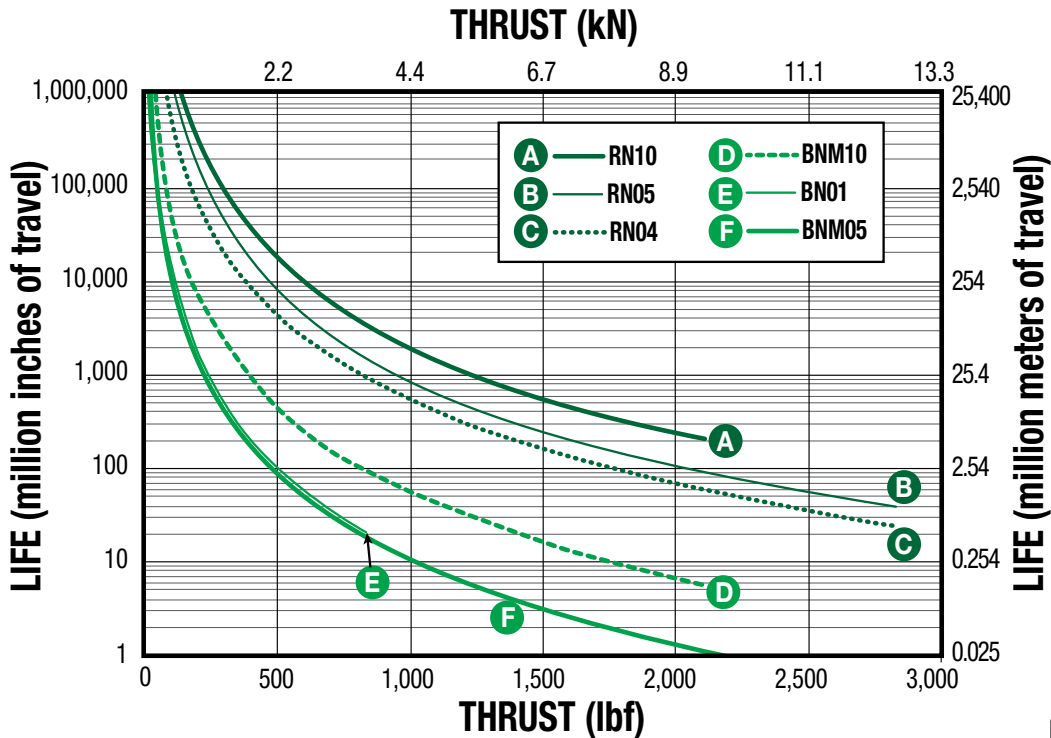

- Mid Screw Support (MSS) provides higher critical speed capabilities for all ball nut options at longer stroke lengths
  - Ball screw always supported in middle of actuator to decrease screw whip at higher rotational speeds
  - Works in all orientations (vertical, horizontal, and at an angle)
  - Maintenance free
  - Available for TRS 225 size for BN, BNM ball screws
- See TRS225 critical speed graph for MSS speed capabilities

 NOTE: MSS option adds 3.1 in (79 mm) to the overall length of the TRS225

## SCREW/NUT COMBINATIONS

## SWITCHES

### SPECIFICATIONS

TRS products offer a wide range of sensing choices. There are 12 switch choices: reed, solid state PNP (sourcing) or solid state NPN (sinking); in normally open or normally closed; with flying leads or quick-disconnect.

Commonly used for end-of-stroke positioning, these switches allow drop-in installation anywhere along the rail on the side of the actuator. The one-piece design includes the retained fastening hardware.

Switches are used to send digital signals to PLC (programmable logic controller), TTL, CMOS circuit or other controller device. Switches contain reverse polarity protection. Solid state QD cables are shielded; shield should be terminated at flying lead end.

All switches are CE rated and are RoHS compliant. Switches feature bright red or yellow LED signal indicators; solid state switches also have green LED power indicators.

	Order Code	Lead	Switching Logic	Power LED	Signal LED	Operating Voltage	**Power Rating (Watts)	Switching Current (mA max.)	Current Consumption	Voltage Drop	Leakage Current	Temp. Range	Shock / Vibration
REED	<b>R</b> <b>Y</b>	5m	SPST Normally Open	—	Red	5 - 240 AC/DC	**10.0	100mA	—	3.0 V max.	—	14 to 158°F [-10 to 70°C]	50 G / 9 G
	<b>R</b> <b>K</b>	QD*											
	<b>N</b> <b>Y</b>	5m	SPST Normally Closed	—	Yellow	5 - 110 AC/DC							
	<b>N</b> <b>K</b>	QD*											
SOLID STATE	<b>T</b> <b>Y</b>	5m	PNP (Sourcing) Normally Open	Green	Yellow	10 - 30 VDC	**3.0	100mA	20 mA @ 24V	2.0 V max.	0.05 mA max.		
	<b>T</b> <b>K</b>	QD*											
	<b>K</b> <b>Y</b>	5m	NPN (Sinking) Normally Open	Green	Red								
	<b>K</b> <b>K</b>	QD*											
	<b>P</b> <b>Y</b>	5m	PNP (Sourcing) Normally Closed	Green	Yellow								
	<b>P</b> <b>K</b>	QD*											
	<b>H</b> <b>Y</b>	5m	NPN (Sinking) Normally Closed	Green	Red								
	<b>H</b> <b>K</b>	QD*											

\*QD = Quick-disconnect Enclosure classification IEC 529 IP67 (NEMA 6) CABLES: Robotic grade, oil resistant polyurethane jacket, PVC insulation

⚠️\*\*WARNING: Do not exceed power rating (Watt = Voltage x Amperage). Permanent damage to sensor will occur.

# TRS Twin Rail Stage Actuator

## WIRING DIAGRAMS

## SWITCH INSTALLATION AND REPLACEMENT

Place switch in side groove on tube at desired location with "Tolomatic" facing outward. While applying light pressure to the switch, rotate the switch halfway into the groove. Maintaining light pressure, rotate the switch in the opposite direction until it is fully inside the groove with "Tolomatic" visible. Re-position the switch to the exact location and lock the switch securely into place by tightening the screw on the switch.

# SELECTION GUIDELINES

The process of selecting a load bearing actuator for a given application can be complex. It is highly recommended that you contact Tolomatic or a Tolomatic Distributor for assistance in selecting the best actuator for your application. The following overview of the selection guidelines are for educational purposes only. The Tolomatic Sizelt Software is also available on Tolomatic.com

## 1 CHOOSE ACTUATOR SIZE

Choose an actuator that has the thrust, speed and moment load capacity to move the load. Use the Critical Speed graph (page TRS\_9) for the screw and the Moment and Load Capacity table (pg. TRS\_6) for the actuator.

## 2 COMPARE LOAD TO MAXIMUM LOAD CAPACITIES

Calculate the application load (combination of load mass and forces applied to the carrier) and application bending moments (sum of all moments Mx, My, and Mz applied to the carrier). Be sure to evaluate the magnitude of dynamic inertia moments. When a rigidly attached load mass is accelerated or decelerated, its inertia induces bending moments on the carrier. Careful attention to how the load is decelerated at

the end of the stroke is required for extended actuator performance and application safety. If either load or any of your moments exceed figures indicated in the Moment and Load Capacity table (pg. TRS\_6) for the actuator consider:

- 1) Higher capacity bearing style
- 2) A larger actuator size
- 3) External guide system

## 3 CALCULATE LOAD FACTOR LF

For loads with a center of gravity offset from the carrier account for both applied (static) and dynamic loads. The load factor (LF) must not exceed the value of 1.0

$$L_f = \frac{M_x}{M_{x_{max}}} + \frac{M_y}{M_{y_{max}}} + \frac{M_z}{M_{z_{max}}} + \frac{F_y}{F_{y_{max}}} + \frac{F_z}{F_{z_{max}}} \leq 1.0$$

If LF exceeds the value of 1.0, consider the four choices listed in step #2.

## 4 ESTABLISH YOUR MOTION PROFILE AND CALCULATE ACCELERATION RATE

Using the application stroke length and maximum carrier velocity (or time to complete the linear motion), establish the motion profile. Select either triangular (accel-decel) or trapezoidal (accel-constant speed-decel) profile. Now calculate the maximum acceleration and deceleration rates of the move. A TRS twin rail screw-driven actuator speed should not exceed the value in the critical speed capacity graph (page TRS\_9) for the screw/nut combination chosen. Also, do not exceed safe rates of dynamic inertia moments determined in step #3.

## 5 SELECT THE LEAD SCREW

Based on the application requirements for accuracy,

backlash, quiet operation, life, etc. select the appropriate screw type (ball screw or roller screw) and the pitch (lead). For additional information on screw selection, consult "Selecting the Optimal Screw Technology" (#9900-4644) available at www.tolomatic.com.

## 6 SELECT MOTOR AND DRIVE

To help select a motor and drive, leverage the Tolomatic Sizelt software, available on Tolomatic.com to calculate the application thrust and torque requirements.

## 7 CONSIDER OPTIONS

- TC\_ Toe clamps
- C2C Carrier-to-carrier mounting
- Switches - Reed, Solid State PNP or NPN, all available normally open or normally closed

### SPEED FACTOR

FOR APPLICATIONS WITH HIGH SPEED OR SIGNIFICANT SHOCK AND VIBRATION: Loads and bending moments must be multiplied by speed factor from the graph below to obtain full rated life of profiled rail bearing system.

	mm	in

**MODEL**  
ST<sub>1</sub> Standard TRS actuator  
HT<sub>1</sub> High Torque Option

**MOTOR MOUNTING / REDUCTIONS**

The length on the leadscrew and coupling device is determined by motor selection. Motor type and frame size must be specified when ordering.

(must choose one)

LMI In-Line mount  
RPL1 1:1 Reverse-Parallel mount left  
RPR1 1:1 Reverse-Parallel mount right  
RPB1 1:1 Reverse-Parallel mount bottom  
RPT1 1:1 Reverse-Parallel mount top  
RPL2 2:1 Reverse-Parallel mount left  
RPR2 2:1 Reverse-Parallel mount right  
RPB2 2:1 Reverse-Parallel mount bottom  
RPT2 2:1 Reverse-Parallel mount top

**BASE MOUNTING**  
**Blank** Standard bottom threaded holes, no Toe clamp mounting slots  
**TC<sub>x</sub>** Toe clamps + mounting slots\*  
\*x = number of toe clamps

**CARRIER MOUNTING**  
**Blank** Standard Carrier  
**C2C** Carrier-to-carrier mounting\*\*  
\*\*Only available for 100 & 225 sizes  
**C2B** Carrier-to-base mounting†  
†Only available with 225 size

**⚠ Due to the complexity of the moment loads in a carrier to carrier system, Tolomatic recommends working with a Tolomatic representative to size the system**

**MID SCREW SUPPORT**  
**MSS** Support for high speeds and long stroke length§  
§Only available for TRS225 w/ball screw

**SWITCHES**

**RY** Reed Switch (Normally Open) with 5-meter lead, & enter quantity desired  
**RK** Reed Switch (Normally Open) with 5-meter lead/QD, & quantity  
**NY** Reed Switch (Normally Closed) with 5-meter lead, & quantity  
**NK** Reed Switch (Normally Closed) with 5-meter lead/QD, & quantity  
**TY** Solid State Switch PNP (Normally Open) with 5-meter lead, & quantity  
**TK** Solid State Switch PNP (Normally Open) with 5-meter lead/QD, & quantity  
**KY** Solid State Switch NPN (Normally Open) with 5-meter lead, & quantity  
**KK** Solid State Switch NPN (Normally Open) with 5-meter lead/QD, & quantity  
**PY** Solid State Switch PNP (Normally Closed) with 5-meter lead, & quantity  
**PK** Solid State Switch PNP (Normally Closed) with 5-meter lead/QD, & quantity  
**HY** Solid State Switch NPN (Normally Closed) with 5-meter lead, & quantity  
**HK** Solid State Switch NPN (Normally Closed) with 5-meter lead/QD, & quantity  
Note: QD = Quick Disconnect

purchase

NOTE: Brakes mounted on reverse parallel motor mounts (especially in vertically positioned actuators) will not prevent back driving of the screw and the load falling under gravity in the event of a timing belt failure. An inline motor mount with a fail-safe brake mounted directly to the actuator shaft or a special geared or thru-shaft reverse parallel construction should be considered if a brake is required in a safety critical application. Contact Tolomatic for alternate reverse parallel brake mounting options.

Gearheads may be used with reverse parallel motor mounts. However, the torque on the belt and internal RP components must remain below the capabilities of the assembly to prevent belt slipping or premature failure. Contact Tolomatic for additional information if required.
