# Magnetic Measurement Technology „Made in Germany“

BOGEN was founded in 1951 as a family business. In the beginning we concentrated on the development and production of magnetic heads for writing and reading data for tape recorders, cassette recorders, credit card and parking ticket applications, but also for secure banknote validation.

Today, BOGEN is an internationally recognized specialist for high-performance magnetic measurement solutions in industry and has years of experience in the development and manufacturing of systems for complex measurement and control tasks. These include absolute and incremental measurements of lengths, angles, speeds and rotational speeds.

With our high-precision production facilities, we have extensive expertise in manufacturing a complete range of standard magnetic sensors, magnetic rings and tapes for demanding positioning, rotation and motion applications. From prototype to high volume production, our components and magnetic measurement solutions ensure the highest accuracy requirements while maintaining high working distance tolerances.

In 2020 BOGEN Magnetics GmbH was taken over by Lika Electronic s.r.l., Italy.

# Complete Range of Magnetic Measurement Components

## Magnetic Sensing Heads

BOGEN offers a complete range of magnetic sensing heads for incremental, absolute, linear and rotary measurement for many different applications in industry.

## Rotary and Linear Magnetic Scales

BOGEN manufactures and offers a vast choice of linear and rotary magnetic scales for a large variety of different applications. Production processes at BOGEN allow any magnetic pole pattern to be created: single or multiple tracks, with or without reference mark, different accuracy classes, and much more... BOGEN magnetic scales can be as individual as the customer requires.

## Magnetic Reading and Writing Heads

BOGEN magnetic heads can be found in countless applications in everyday life wherever information must be read and written magnetically: for example in car parks or in ATMs when withdrawing money. BOGEN also offers solutions for banknote authentication. For more information on our magnetic heads please refer to our website.

# Magnetic Measuring Solutions Tailored to Your Requirements

BOGEN not only offers a complete range of standard components and products, but also develops customized special solutions.

Instead of designing around an existing standard solution, we work closely with our customers to create product configurations that are 100% tailored to their individual requirements. This increases our customers' degrees of freedom in development design and accelerates the development of new products, and very compact encoder designs can be realized.

Over the past decades, we have worked closely with partners in a wide range of industries. From manufacturers of advanced surgical and service robots to measurement solutions for the automotive imaging industry and aerospace applications, our magnetic measurement systems reliably meet even the most stringent requirements.

# Absolute Magnetic Sensing Heads

BOGEN absolute encoders and the corresponding magnetic scales offer cost-efficient solutions for industrial applications where positions and motions have to be measured with a high degree of accuracy and reliability, even in harsh environments. All encoders are available for linear, rotary-radial or rotary-axial measurement and include multiple sensor output protocols. Small dimensions ensure implementation even in confined spaces.

# Incremental Magnetic Sensing Heads

BOGEN offers compact incremental magnetic sensing heads featuring extremely high accuracy and a particularly high degree of modularity. They deliver reliable measuring results even for fast movement speeds and an almost unlimited measuring length. BOGEN sensing heads come with a robust design for customers in automation, instrumentation and motion control applications. Several adjustable parameters allow easy modification of the sensing heads to application-specific needs.

# Linear Magnetic Scales

BOGEN's extensive portfolio of linear magnetic scales ensure highly reliable and accurate results up to 3 microns wherever positions and motions have to be measured. They are resistant against humidity, contamination, temperature fluctuations and vibrations and therefore ideal for use in harsh industrial environment.

## Accessories

**Aluminum Extrusion Profile**

- material: aluminum
- width: 20 mm (for scale width of 8 mm)
- length: max. 6000 mm
- thickness: 4 mm
- div. options available

**Scale Applicator**

- for easier application of long linear scales

# Rotary Magnetic Scales

Motion control and angle measuring have never been easier and more reliable with BOGEN's rotary magnetic scales. Different magnetic and hub materials and customizable dimensions ensure that our rotary scales suit various tasks and applications.

## Where to Find Us

BOGEN has a distribution network with subsidiaries and partner companies worldwide.

This is how we ensure competent and technical support on site

BOGEN Magnetics GmbH reserves the right to make changes, without notice, in the products, including software, described or contained herein in order to improve design and/or performance. Information in this document is believed to be accurate and reliable. However, BOGEN Magnetics GmbH does not give any representations or warranties, expressed or implied, as to the accuracy or completeness of such information and shall have no liability for the consequences of use of such information. BOGEN Magnetics GmbH takes no responsibility for the content in this document if provided by an information source outside of BOGEN products. In no event shall BOGEN Magnetics GmbH be liable for any indirect, incidental, punitive, special or consequential damages (including but not limited to lost profits, lost savings, business interruption, costs related to the removal or replacement of any products or rework charges) irrespective the legal base the claims are based on, including but not limited to tort (including negligence), warranty, breach of contract, equity or any other legal theory. Notwithstanding any damages that customer might incur for any reason whatsoever, BOGEN product aggregate and cumulative liability towards customer for the products described herein shall be limited in accordance with the General Terms and Conditions of Sale of BOGEN Magnetics GmbH. Nothing in this document may be interpreted or construed as an offer to sell products that is open for acceptance or the grant, conveyance or implication of any license under any copyrights, patents or other industrial or intellectual property rights. Unless otherwise agreed upon in an individual agreement BOGEN products sold are subject to the General Terms and Conditions of Sales as published at [www.bogen-magnetics.com](http://www.bogen-magnetics.com).

## Headquarter, Production, Sales

BOGEN Magnetics GmbH  
Potsdamer Str. 12 - 13  
14163 Berlin - Germany  
Phone +49 30 81 00 02-0
